What we do?

The Invasive Plant Company provides solutions to residents, land owners, property developers and Local Authorities with invasive plant problems.

We provide advice and surveying services to best advise our clients, the options available to them when faced with Japanese Knotweed or other invasive species on their property or development site.

We also provide the necessary manpower and equipment to execute the chosen solution in our contracting role from start to finish and include monitoring / maintenance post works in all projects.

Our Techniques

We have developed a number of techniques to deal with Japanese Knotweed and we specialise in methods that reduce the amount of material to be sent off site which saves our clients money.

1 Dig Sift and Burial

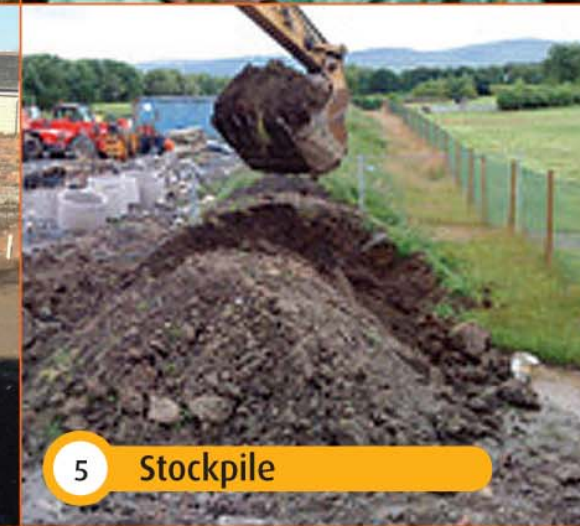

2 Herbicide Treatment

3 Dig and Dump

4 Partial Excavation

5 Stockpile
